

RAID KHAWALDEH

Business Leader, Entrepreneur, Engineer, Technology Advisor

About Me

After the completion of his Bachelor of Science in Electrical Engineering, Raid followed his passion of technology and continued his education to receive a Master's of Science in Telecommunications Engineering. Subsequently he immigrated to Canada where he proceeded to work in a number of fast-paced, up-scale environments throughout various Technology industries.

With a keen interest in technology, his move to the USA was a natural fit. Succeeding his endeavor, he began working as an expert consultant for Multinational organizations. Raid also mentored and lectured engineering & business management across different colleges and served as advisor for multiple boards. Today, he is a board member and a shareholder in one of the reputable American Schools in Dubai. He also served at the ICS board as a vice chair during the past two years.

Throughout his endeavors, his boundless expertise was acknowledged and appreciated by the Senate office of the United States. His resume lists numerous research projects in which he has been involved. In addition, he co-authored various publications in the field of Neural Networks Intelligence & Process Improvement. Ultimately his hard work, dedication and experience enabled him to become the founder and owner of the T-Force group of companies, which was ranked as one of the 500 list of the fastest growing companies in the USA for three consecutive years.

Given his experience as an entrepreneur and as a visionary, Raid continually invests in a number of startups and builds technology solutions across multiple industry verticals aspiring to revolutionize the way enterprises operate and do business.
